

NEW Lithium Iron Phosphate Battery (LiFePO_4)

SUSTAINABLE

- » Contains no toxic heavy metals and is safe for the environment.
- » Easier to recycle and reduced overall ecological impact.

PERFORMANCE

- » Delivers stable power even at low charge levels.
- » Operates reliably in both hot and cold conditions.

COST-EFFECTIVE

- » Lightweight and completely maintenance-free.
- » Charges faster and lasts significantly longer than lead-acid batteries.

Jauch Quartz GmbH offers a wide range of 12V lithium battery packs to meet most of our customer needs. Perfect replacement for lead-acid batteries.

NEW: Lithium Iron Phosphate Battery (LiFePO₄)

Driven by quality and innovation, we're building a greener future together. We don't just power devices – we work together to find the best solution for your specific application.

JAUCH LiFePO₄

10 years
More than 2000 times
Up to 30% lighter
60% faster charge

Lead Acid Battery

3 years
200 - 550 times
Heavy and difficult to handle
Long charging times

SUSTAINABLE

Lithium Iron Phosphate batteries are a cleaner, safer alternative to traditional lead-acid batteries. They contain no toxic heavy metals, are easier to recycle, and have a significantly lower environmental impact throughout their lifespan. With higher energy efficiency, they help reduce overall energy consumption.

PERFORMANCE

Thanks to their high energy density and long cycle life, LiFePO₄ batteries deliver reliable power for years. They maintain stable performance even at low charge levels and operate efficiently across a wide range of temperatures – making them ideal for demanding environments.

COST-EFFECTIVE

Compared to bulky lead-acid batteries, LiFePO₄ units are much lighter and easier to handle. They require no maintenance, charge faster, and last significantly longer – resulting in lower replacement costs and better value over time.
